

Maths Home Learning

Each lesson will begin with a video which will show you your learning for the session. During the video, you may be asked to pause it and complete some of the questions in the activity booklet. If you want to rewind the video so you can see examples again, that's fine.

Each of the lessons should take you roughly half an hour to complete. You should be designating about an hour to maths each day, as we do in school. Please make up the difference using <https://www.mathshed.com/> and <https://www.topmarks.co.uk/>.

Some of the activities may ask you to compare your answers to a partner. If you see this, you can either compare your ideas with a family member (if they're free) or complete and compare two examples yourself.

You will need to be connected to the Internet to watch the videos. It would be worth printing off the work for each lesson before you begin the video for it. All of the worksheets are PDF files. The name of the relevant PDF for each lesson is shown in the table below. If you're unable to print off the work, complete it on a piece of paper or in a book. Once you have finished, you may wish to go through your answers with a family member using the answer document for the lesson.

Remember to upload your work to Seesaw for your teachers to see!

Lesson one	Objective: To add and subtract multiples of 100.	https://vimeo.com/459318816	Year 3 Lesson 1 activity booklet	Year 3 Lesson 1 answer booklet
Lesson two	Objective: To add and subtract ones.	https://vimeo.com/459364931	Year 3 Lesson 2 activity booklet	Year 3 Lesson 2 answer booklet
