

Home Learning Pack Year 1 Autumn 2020

You will need to be connected to the internet to watch the lessons and access the activities. For each lesson, there is an activity worksheet for your child to complete, please print this before each of the lessons. If you are unable to print off the worksheets, your child can complete the work on a piece of paper or in a book. Once they have finished, please go through the answers with your child. Each lesson will begin with a video which will show your child their learning for the session. During the video, your child may be asked to pause it and complete some of the questions on the worksheet. Please feel free to watch the videos as many times as your child requires. The timings of each of the lessons vary slightly; some may be shorter than others. In school we aim to teach around 1 hour of Maths a day, therefore please feel free to add in any extra Maths activities where possible. These activities could be linked to that day's objective, or any other areas you feel your child needs additional support, such as adding, subtraction, number recognition and writing digits correctly.

Week 1	Activity	Video link
Day 1	Maths Day 1 Worksheet	https://vimeo.com/451798412
Day 2	Maths Day 2 Worksheet	https://vimeo.com/452573080
